EDUCATION

2021 - 2022	**Full-stack Software Development, University of Denver**	Certificate
2013 - 2014	**Belarusian National Technical University**	M.Arch.
	Belarusian National Technical University	B.Arch.

CAREER OBJECTIVE

Motivated software developer with an extensive background in Building Architecture and Design, recently graduated from the University of Denver **Full-Stack Coding** Bootcamp. Creative problem solver with strong design, communication, and project management skills, looking for an opportunity to implement, advance, and expand my newly acquired technical skill set, working on challenging and fulfilling projects.

PROFESSIONAL EXPERIENCE

2023 - PRES.   4240 Architecture, Denver, CO   **Project Architect**
- managed consultant team on multiple projects
- incorporated design ideas using Building Information Modeling and visualisation
- successfully lead projects from Schematic Design to Construction Document phase
- managed office corporate events

2021 - 2023   CannonDesign, Denver, CO   **Architect III**
- smoothly managed various design and technical aspects in multiple practice areas: hospitality, healthcare, and corporate projects ($1mm - $250mm construction budgets)
- successfully developed from scratch custom technical solutions for various complex building exterior construction details.
- mentored junior architects with advancing Building Information Modeling and architectural visualization skills.
- managed and led office connect meetings and multiple corporate and team building events.

2019 - 2021   Ottinger Architects, Los Angeles, CA   **Project Designer**
- successfully incorporated using new architectural visualization software in the company design process.
- effectively worked with city officials on-site development issues, including re-zoning and modifications to existing zoning.
- actively helped with the development of WFH company policies.

2016 - 2019   MohagenHansen Architecture, Wayzata, MN   **Designer**
- developed well-optimized and cost-efficient design solutions for multiple corporate and government clients.
- trained all personnel levels and deployed the Building Information Model company-wide.
- developed creative and effective custom design solutions for high-end dwelling complexes, which as the result helped to win more additional ongoing business with the same client group.

2013 - 2016   TMV Architects, Minsk, Belarus   **Architect**
- participated in international projects.
- successfully learned and helped with the deployment of a new software company-wide.
- acquired one of the necessary certificates required for company licensing.
